
1. Problem Title

Student Information Management System

2. Problem Statement

Develop a web application using Django that allows users to create an account, log in to the system, and manage student records.

The application should provide common pages that can be accessed by everyone, while the student management module should only be accessible after successful login.

The logged-in user can perform the following operations:

- Add student information.
- View all students.
- Edit student details.
- Delete student records.
- Logout from the system.

The purpose of this application is to understand Django authentication and CRUD operations.

3. Functional Requirements

The system should provide the following modules:

1. Home Page

- Display project information.
- Accessible to all users.

2. About Page

- Display developer and project details.
- Accessible to all users.

3. User Registration

- New users can create an account.

4. User Login

- Registered users can log in.

5. User Logout

- Users can log out from the system.

6. Student Management

Authenticated users can:

- Add student records.
 - View all student records.
 - Update student details.
 - Delete student records.
-

4. Student Model

The system should store the following information:

Field	Data Type
-------	-----------

Name	Character
------	-----------

Branch	Character
--------	-----------

Semester	Integer
----------	---------

Email	Email
-------	-------

5. Pages Required

Page	URL
------	-----

Home	/
------	---

About	/about/
-------	---------

Signup	/signup/
--------	----------

Login	/login/
-------	---------

Logout	/logout/
--------	----------

Student List	/students/
--------------	------------

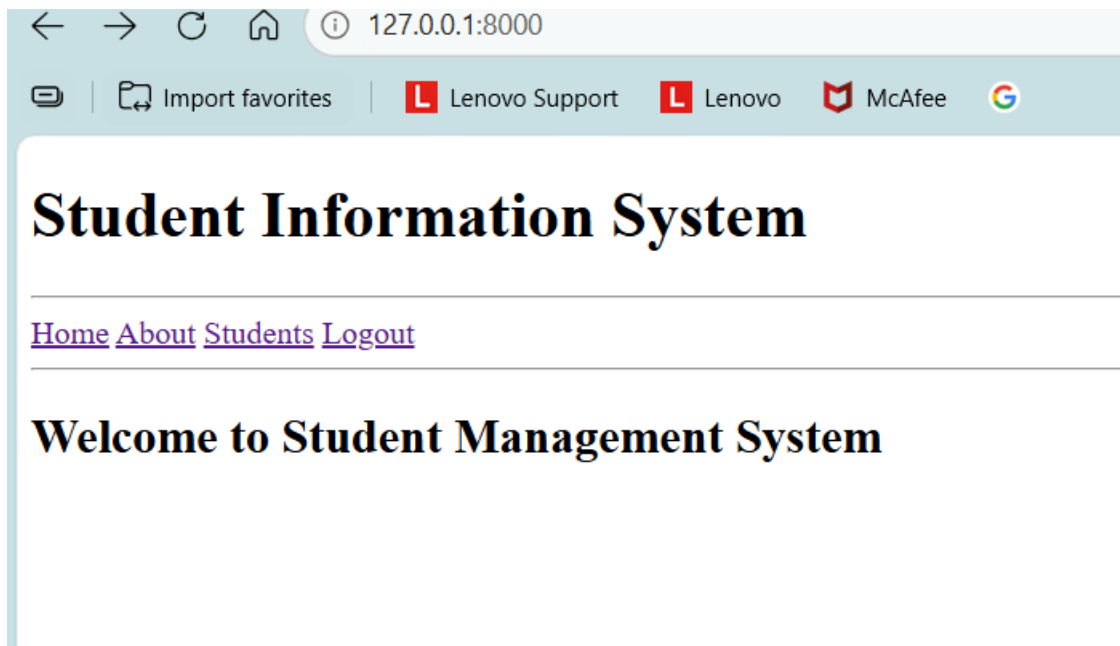

Add Student	/students/add/
-------------	----------------

Edit Student	/students/edit/id
--------------	-------------------

Delete Student	/students/delete/id
----------------	---------------------

6. Expected Output

Home Page

Registration Page

A screenshot of the 'Signup' page within the 'Student Information System'. The browser address bar shows '127.0.0.1:8000/signup/'. The page has a light blue header with navigation links: 'Home', 'About', 'Login', and 'Signup'. The main content area is titled 'Signup' and contains a form with the following fields and instructions:

- Username:** A text input field followed by the instruction: 'Required. 150 characters or fewer. Letters, digits and @/./+/_ only.'
- Password:** A text input field followed by a bulleted list of password requirements:
 - Your password can't be too similar to your other personal information.
 - Your password must contain at least 8 characters.
 - Your password can't be a commonly used password.
 - Your password can't be entirely numeric.
- Password confirmation:** A text input field followed by the instruction: 'Enter the same password as before, for verification.'

At the bottom of the form is a 'Register' button.

8. Constraints

1. Only logged-in users can access student pages.
 2. Anonymous users should be redirected to the login page.
 3. All fields are mandatory.
 4. Student name cannot be empty.
-
