

Problem Definition: Django Project — **communityhub**

You are required to create a Django project named **communityhub** that includes two apps:

- **workshops** (for managing and listing workshops)
- **speakers** (for listing speaker profiles)

The project should meet the following specifications.

✓ 1. Home Page

- The home page should have two navigation links:
 - **Upcoming Workshops**
 - **Speaker Profiles**
- HTML Snippet for this page:

```
<html>
<head><title>Community Hub</title></head>
<body>
<h1>Welcome to Community Hub</h1>
<a href="#">Upcoming Workshops</a><br><br>
<a href="#">Speaker Profiles</a>
</body>
</html>
```
- **Example of Home Page:**

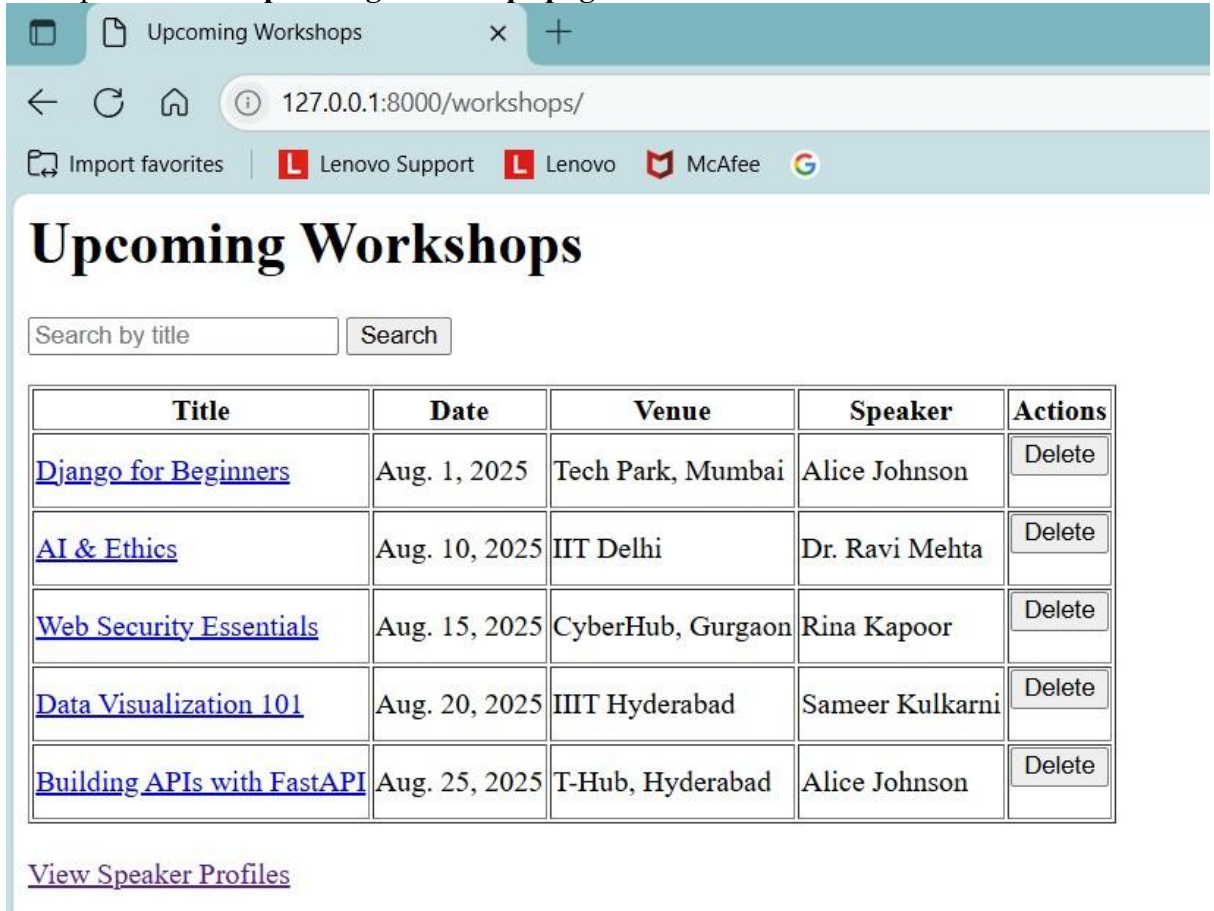

✓ 2. Upcoming Workshops Page (**workshops** app)

- Displays a **list of upcoming workshops** in a table format.
- The table should include:
 - Workshop Title
 - Date
 - Venue

- Speaker Name
- Functionalities:
 - A **search bar** to search workshops by **title**.
 - A **Delete button** for each workshop.
 - A **View Details** link on each workshop title that opens a separate detail page with all its info.
- There should also be a link at the bottom labeled **"View Speaker Profiles"** which redirects to the `speakers` app.
- HTML Snippet for **list of upcoming workshops** page:

```
<html>
<head><title>Upcoming Workshops</title></head>
<body>
<h1>Upcoming Workshops</h1>
<form method="GET">
<input type="text" name="q" placeholder="Search by title">
<button type="submit">Search</button>
</form>
<table border="1">
<thead>
<tr>
<th>Title</th>
<th>Date</th>
<th>Venue</th>
<th>Speaker</th>
<th>Actions</th>
</tr>
</thead>
<tbody>
<tr>
<td>DTL for title with <a> tag</td>
<td>DTL for Date</td>
<td>DTL for Venue</td>
<td>DTL for speaker</td>
<td>
<form method="POST" action="#">
  {% csrf_token %}
  <button type="submit">Delete</button>
</form>
</td>
</tr>
{DTL to check empty data}
<tr><td colspan="5">No workshops available.</td></tr>
</tbody>
</table>
<br>
<a href="#">View Speaker Profiles</a>
</body>
</html>
```

- Example of **list of upcoming workshops page**:

Upcoming Workshops

Search by title

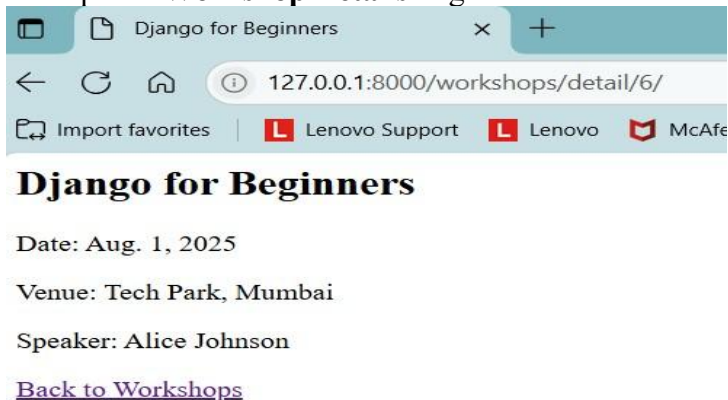

Title	Date	Venue	Speaker	Actions
Django for Beginners	Aug. 1, 2025	Tech Park, Mumbai	Alice Johnson	Delete
AI & Ethics	Aug. 10, 2025	IIT Delhi	Dr. Ravi Mehta	Delete
Web Security Essentials	Aug. 15, 2025	CyberHub, Gurgaon	Rina Kapoor	Delete
Data Visualization 101	Aug. 20, 2025	IIIT Hyderabad	Sameer Kulkarni	Delete
Building APIs with FastAPI	Aug. 25, 2025	T-Hub, Hyderabad	Alice Johnson	Delete

[View Speaker Profiles](#)

- HTML Snippet for **Workshop Details Page**:

```
<html>
<head><title></title></head>
<body>
<h2>DTL for title</h2>
<p>Date: DTL for Date</p>
<p>Venue: DTL for Venue </p>
<p>Speaker: DTL for Speaker </p>
<a href="#">Back to Workshops</a>
</body>
</html>
```

- Example of **Workshop Details Page**:

Django for Beginners

Date: Aug. 1, 2025

Venue: Tech Park, Mumbai

Speaker: Alice Johnson

[Back to Workshops](#)

✓ 3. Speaker Profiles Page (`speakers` app)

- Displays a list of all **speakers**.
- Each entry shows:
 - Name
 - Profession
 - Short Bio
- There should be:
 - A **search bar** to search speakers by **name**.
 - A link to **View Details** for each speaker which shows name, profession, bio, and a message like:
"This speaker may be featured in one of our workshops."
- At the bottom, a link should take users back to the **Upcoming Workshops** page.
- HTML Snippet for **list of all Speakers** Page:

```
<html>
<head><title>Speaker Profiles</title></head>
<body>
<h1>Speaker Profiles</h1>

<form method="GET">
  <input type="text" name="q" placeholder="Search by name">
  <button type="submit">Search</button>
</form>

<ul>
  <li>
    DTL for name (DTL for Profession) —
    <a href="#">View Details</a>
  </li>
  {DTL to check empty data}
  <li>No speakers found.</li>
</ul>

<br>
<a href="#">View Upcoming Workshops</a>
</body>
</html>
```

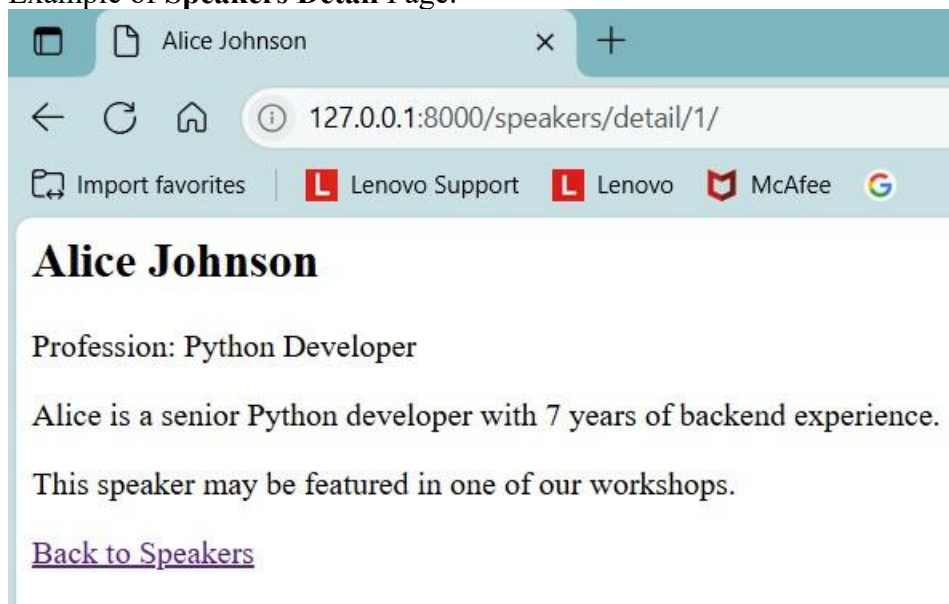

- Example of **list of all Speakers** Page:

- HTML Snippet for **Speakers Detail** Page:

```
<html>
<head><title></title></head>
<body>
<h2>DTL for name</h2>
<p>Profession: DTL for profession</p>
<p>DTL for bio </p>
<p>This speaker may be featured in one of our workshops.</p>
<a href="#">Back to Speakers</a>
</body>
</html>
```

- Example of **Speakers Detail** Page:

✓ 4. Admin Functionality

- All data (workshops and speakers) must be created and managed through the Django **admin interface**.
- All listings should be dynamically loaded from the database.
- No foreign key relationship is required to be used between models.

✓ 5. Detail and Delete Pages

- Clicking on a workshop title opens a **workshop detail page** showing:
 - Title, Date, Venue, and Speaker Name.
- Clicking a speaker's detail link shows:
 - Name, Profession, Bio.
- We can **delete workshops** directly from the Upcoming Workshops page.

✓ 6. Superuser Requirement

- Create a **superuser** with:
 - **Username:** your Roll Number
 - **Password:** your Enrollment Number

📁 Suggested Models

Workshop Model (in `workshops/models.py`) should have following fields

```
title
date
venue
speaker_name
```

Speaker Model (in `speakers/models.py`) should have following fields

```
name
profession
bio
```
